Quick Start Guide:

Connection scheme of your Didactum Monitoring System 100 III:

Fig.: Connection of Didactum Monitoring System 100 III. For other models, please refer to
the knowlege base on http://wiki.en.didactum-security.com
Assign IP address of your monitoring device
All Didactum monitoring systems have a built-in web interface. To access this web interface, you have to use a web browser. In the command line of your browser please insert the IP address of your Didactum monitoring system.

Attention: Didactum relies on HTML5. Please make sure that you are using the latest version of your web browser. All Didactum monitoring systems were tested under Chrome, Firefox and Safari. Please check that you are using latest version of Java. If necessary, you can download here: http://www.java.com

Default settings of your Didactum monitoring device

<table>
<thead>
<tr>
<th>DHCP Client</th>
<th>disabled</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hostname</td>
<td>didactum</td>
</tr>
<tr>
<td>IP address of device</td>
<td>192.168.0.193</td>
</tr>
<tr>
<td>Network mask</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Broadcast</td>
<td>192.168.0.1</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.0.255</td>
</tr>
<tr>
<td>Primary DNS</td>
<td>192.168.0.1</td>
</tr>
</tbody>
</table>

Attention: To access the web interface of the Didactum monitoring system, your computer must have same network IP range. To ensure this, please make on your computer the subnet mask of 255.255.255.0, and the IP address 192.168.0.xxx. xxx is a number between 0 and 254. Please check that the Didactum device and your computer do not have identical IP addresses. So please take as IP address for your computer e.g. 192.168.0.100

If you have further questions about the network configuration of your computer, please contact your administrator or the manufacturer of your operating system (OS).

First login:

![Login to Didactum](Image)
